

# Sensors in Food and Agriculture 2018

18 - 19 July

John Innes Centre, Norwich

The 3rd Annual Sensors in Food and Agriculture 2018 conference takes place on 18 - 19 July 2018 at the John Innes Centre in Norwich Research Park. The conference will explore current and future opportunities for the application of sensor technology in agriculture and food production.

## Pogram Includes:

|  |   |
|--|---|
|    | Automated detection of plant pathogens in the field - the future of precision agriculture<br><i>Dr. Kevin King, Rothamsted Research</i> |
|    | So you want to use IoT in Agri?<br><i>Prof. Julie McCann, Imperial College London</i><br><i>AESE: Adaptive Emergent Systems Group</i>   |
|   | Ag Tech 2.0 :Artificial Intelligence and Beyond<br><i>Ed Plowman, Hummingbird Technologies</i>  |
|  | Monitoring spoilage of meats with 'zero-cost' paper based gas sensors<br><i>Dr. Firat Güder, Imperial College London</i>                |

**Exhibits | Poster Displays | Panel Discussion**  
**Networking reception on 18th July**

Register now to learn new things, meet new people, discover new technology, all in the informal environment which characterises Sensor100 conferences.
