# You're Hired 2019

Wednesday 27 November 2019, The Old Library, Birmingham, UK

## Synopsis

Within the global chemistry sector there are a large number of potential careers and deciding on which one is right for you can be a daunting decision. Once a starting point has been identified, the next challenge is securing that position. This event will highlight some careers that are available in academia and in some obvious and not so obvious industries. The speakers will describe what those roles look like on a day-to-day basis and the potential paths into them including the types of support that are available to help you succeed. There will also be ample time for networking opportunities with fellow researchers, industry contacts as well as the chance to understand what employers would like to see from you.
