

## Programme

Friday 30 November 2018, Shanghai, China

Time	Event	Session chair
9:00–9:20	<b>Introduction and welcome</b> By Guoxin Jin and Andrew Shore	
9:20–9:50	<b>Hydrogen evolution from molecular catalysts inside metal-organic frameworks</b> Sascha Ott, Uppsala University, Sweden	<b>Guoxin Jin</b> Fudan University
9:50–10:20	<b>Enhanced optical nonlinearity of porphyrin covalently functionalized graphene and carbon nanotubes</b> Chi Zhang, Tongji University, China	
10:20–10:50	Coffee break	
10:50–11:20	<b>Bioorganometallic chemistry: synthetic strategies and biomedical applications for metal-peptide bioconjugates</b> Nils Metzler-Nolte, Ruhr-Universität Bochum, Germany	<b>Sascha Ott</b> Uppsala University
11:20–11:50	<b>Design of chiral MOFs and COFs for heterogeneous catalysis</b> Yong Cui, Shanghai Jiao Tong University, China	
11:50–14:00	<b>Photo and lunch</b>	
14:00–14:30	<b>New frontiers in the metal-metal bonding and reactivity of early / late heterobimetallic complexes</b> Christine Thomas, The Ohio State University, USA	<b>Chi Zhang</b> Tongji University
14:30–15:00	<b>Supramolecular chemistry with metal-carbene assemblies</b> Yingfeng Han, Northwest University, China	
15:00–15:20	<b>Flash talks</b>	
15:20–15:50	Coffee break	
15:50–16:20	<b>Making single-molecule magnets great again</b> Richard Layfield, University of Sussex, UK	<b>Nils Metzler-Nolte</b> Ruhr-Universität Bochum
16:20–16:50	<b>Chemistry of metal–organic frameworks with multicomponents in order</b> Qiaowei Li, Fudan University, China	
16:50–17:15	<b>Publishing talk by Andrew Shore</b>	<b>Guanqun Song</b> The Royal Society of Chemistry
17:15–17:30	<b>Closing ceremony</b> By Guoxin Jin and Andrew Shore
