Antibiotic resistance is increasing, putting at risk the whole basis of modern medicine and surgery. The need for new antimicrobial agents is urgent and peptides are showing great promise.

Antimicrobial peptides (AMPs) have also been shown to play a part in regulation and modulation of the immune system, hence their alternate name of host defence peptides (HDPs).

IMAP 2019 will cover both the antimicrobial activity of peptides as well as their role in regulation and modulation of the immune system.

## Scientific Programme

- Design, synthesis & mode of action of AMPs / HDPs
- Human & veterinary therapeutic applications of AMPs / HDPs
- Role of AMPs / HDPs in immune modulation
- Peptide biomaterials, peptide-polymer hybrids
- Susceptibility testing of AMPs
