

# Next-Gen Sequencing and Data Analysis Courses and Workshops 2022

*„One of the best courses I have attended. Well organized curriculum and excellent instructors.“*

Konstantinos, Athens

**Give it a try!**

Registration open for all events!

## NGS – Introduction

*Get acquainted with the world of massively parallel sequencing and learn to effectively plan and perform your own experiments!*

- 22-23/3, online

## NGS Data Analysis – Workshop for beginners

*You will not become a bioinformatician, but you will be well on your way to becoming a qualified partner for bioinformaticians in your team.*

- 23-25/5, Prague, CZ
- 7-9/6, Warsaw, PL

## Metataxonomics and metagenomics – Bioinformatics workshop

*Participants will be taught to process metagenomic data from quality control, filtering, assembly / clustering to taxonomic classification, functional classification and comparative metagenomics.*

- 26-27/5, Prague, CZ

## Data visualization in R - Summer Workshop

*You will learn the basics of R, how to become proficient in data handling and the principles of data analysis. All this enables you to learn the power of R for data visualization*

- 25-29/7, Locket, CZ

## 7<sup>th</sup> Prague Autumn School – RNASeq

*For beginners to advanced users, a comprehensive overview of RNASeq data processing and visualization.*

- 10-14/10, Prague, CZ
