

UKERC

UK Energy Research Centre

10th
Annual
Event

International Summer School
06-11 July 2014, Warwick, UK

The UK Energy Research Centre (UKERC) is holding its 10th Annual Energy Summer School from 06-11 July 2014 at the University of Warwick, UK. There will be 100 places available for UK and international students.

The School has been designed to give second year PhD students an opportunity to look beyond their own research and develop a broader understanding of energy and look at pathways to low-carbon and more resilient energy systems.

The School is professionally facilitated to provide continual support for participants, and includes networking opportunities, as well as social events.

We welcome applications from those engaged in energy-related research including technical, physical, social, economic, environmental and business aspects of energy and energy systems.

The Summer School is conducted in English and is highly interactive, so the ability to speak and comprehend English is essential. A fee of £800 will be charged to cover five-nights accommodation and all meals during the School.

The School is normally over-subscribed and UKERC gives preference to second year PhD students, and those who represent a mix of disciplines and provide a balance of UK and non-UK students.

During the week-long School, which runs in parallel to the annual meeting of UKERC's research community, students will:

- **Gain understanding** of global commercial, political and technological challenges in the transition to a low-carbon energy system;
- **Get involved** in high level debate on energy technologies and research priorities in a number of key research areas, from demand reduction to future sources of energy;
- **Be presented** with a number of contrasting international perspectives on energy;
- **Network** with key academic and energy research contacts;
- **Research, debate and agree** a collective vision for a low-carbon energy system with the opportunity to apply their current research and present their work to senior academics, industry and policymakers; and
- **Develop and practice** professional skills in communication and engagement.

Successful applicants will be notified by e-mail from 25 April 2014 and at that time will be asked to formally accept their place. Should the delegate subsequently withdraw and a suitable replacement cannot be found, they will be required to pay for the cost of the unused place.

Registration

Registration is now open until midnight GMT on 07 April 2014.

To register visit: www.regonline.co.uk/ukercSS2014
