

# 8<sup>th</sup> EACR-OECI Joint Course Molecular Pathology Approach to Cancer

04 - 06 June 2018 • Amsterdam, Netherlands

**Molecular pathology is one of the linchpins of precision medicine.** This course will provide a discussion of current concepts in molecular pathology, molecular pathology methods and their application. It will be beneficial for practicing pathologists and oncologists, residents and fellows in pathology and oncology, and molecular biologists with an interest in molecular pathology and precision medicine.

## Topics include

- The role of the pathologist in precision medicine
- Massively parallel sequencing methods and data interpretation
- Gene expression regulation
- Plasma circulating cell-free DNA analysis
- Perspectives in molecular testing for clinical decision-making in oncology in Europe and USA
- The molecular pathology of immunotherapy response

Reduced registration rates  
& Meeting Bursary Awards  
for EACR/OECI members

“ Clear presentations about the latest advances in the field. Perfect size, easy to make new contacts. ”

Feedback from participants on the 2017 course

## Confirmed Speakers

**Judith Bovee** Netherlands

**Edwin Cuppen** Netherlands

**Leonor David\*** Portugal

**David Huntsman** Canada

**Andreas Jung** Germany

**Marc Ladanyi** USA

**Serena Nik-Zainal** UK

**Klaus Pantel** Germany

**Daniel Peeper** Netherlands

**Jorge Reis-Filho\*** USA

**Brian Rubin** USA

**Giorgio Stanta\*** Italy

**Matt van de Rijn** USA

**Marc van de Vijver\*** Netherlands

**Britta Weigelt** USA

**Pieter Wesseling** Netherlands
