

Science T-Level Webinar for Employers

March 7th 2023 10-11am on Teams

The RSC Kent Local Section and Mid Kent college are hosting a webinar to help employers understand more about these new qualifications. Whether you want to find out how they can help you to tap into the local talent pipeline, or you want to host a T-level student for their placement and don't know where to start, this webinar is for you!

The agenda:

- **MidKent College**, the **Department for Education** and the **Education Training Foundation** will introduce T-Levels and explain why employers need to be involved with T-Levels.
- An overview of a placement will be given, in addition to the requirements and entry level skills a student will need to work effectively in your field of expertise.
- The **University of Greenwich** and **MidKent College** will highlight the progression routes from college to University with T-Levels
- **Key leaders** from **Kent Scientific Services** and **AbBaltis** will give employer perspectives and share their insights into hosting placement students.

There will be a Q&A forum at the end as we hope this session will generate lots of enquiries into T-Levels and inspire you to get involved.

Please add the link below to your calendar:
