

BNASS 2022: The 20th Biennial National Atomic Spectroscopy Symposium
28th – 29th June 2022

Royal Northern College of Music (RNCM),
124 Oxford Road, Manchester, M13 9RD

BNASS is the biennial meeting of the RSC Atomic Spectroscopy Group and provides an ideal forum to encourage the exchange of ideas and knowledge in analytical atomic spectroscopy. The meeting includes a mix of established and younger speakers, and the organisers would especially like to encourage young researchers to present their results in short oral presentations within each of the topic sessions. Abstract submission is now open and we welcome the following topics which are encouraged for oral and poster presentations:

- Recent spectroscopy advances
- Fundamentals of collision cells including triple quadrupole MS
- Measurement of nanoparticles and single cells
- Bio-imaging and laser ablation applications
- Speciation and metallomics
- Biological and clinical applications of trace element analysis
- Environmental analysis
- Food analysis

Abstract Submission

The submission process is now open. Please submit your abstract through the Oxford Abstracts website: please [click here to enter](#). You will need to register first. The title should be less than 50 words. Abstracts should be less than 250 words and may not contain graphics. Please also provide a 3-4 sentence biography which will be used by the session chair to introduce your presentation (150 word limit).
