Science Summit 2018

Chemical and Genetic Screening – Exploring the Future Frontiers of Human Health

We bring together an excellent group of researchers actively involved in chemical and genetic screenings from various independent angles. This year the topics will range from disease-related networks using haploid genetics to small molecule library screening and high content imaging. In additions to lectures we offer poster exhibitions and flash talks. Anyone with an interest in chemical and genetic screening is welcome to participate. Read more at www.scilifelab.se

Confirmed speakers

- **Thijn Brummelkamp**, Netherlands Cancer Institute, The Netherlands
- **Neil Carragher**, University of Edinburgh, Scotland
- **Johan Flygare**, Lund University, Sweden
- **James Inglese**, National Center for Advancing Translational Sciences, U.S.
- **Susanne Müller-Knapp**, SGC Frankfurt, Goethe Universität Frankfurt, Germany
- **Bernhard Schmierer**, Karolinska Institutet / SciLifeLab, Sweden
- **Krister Wennerberg**, BRIC, University of Copenhagen
- **Carolina Wählby**, Uppsala University / SciLifeLab, Sweden
