

# Improve your process & application performance

## Pump Training & Workshop

Royal Society of Chemistry, London

Date : Friday 21<sup>st</sup> November 2014

Maximize the efficiency of your liquid handling system by attending this half day training.

Limited free place available – [Register Now](#).

Various pumping technologies meet the flow and pressure requirements of an application, and choosing between these has a critical effect on the efficiency and productivity of your process. We provide a framework to identify key drivers for process efficiency and the questions to ask potential vendors.

Join [Cole-Parmer](#) on Friday 21<sup>st</sup> November, from 10:00 to 14:30 at the RSC Chemistry Centre, Burlington House, Piccadilly, London W1J 0BA.

- 09:45 **Registration** and coffee
- 10:00 **The part played by pumps** - an Insider's guide to selecting the right pump technology
- 12:45 **Hot buffet lunch**
- 13:30 **Metering pumps practical** – use the knowledge you gained to solve a real scenario
- 14:30 **Close**

Registration is now open – [find out more](#) or simply complete the [online registration form](#).

### At the end of the seminar you should be able to:

- Be confident in choosing the right pump technology for your application
- Understand some of the problems you may have encountered with your pump system
- Make informed technical purchase decisions

### Quotes from previous delegates :

*“Good to have relevant industrial examples, explained with reasons to selection.”*

*“Useful information on the features of different types of pumps, and which features fit our applications. Learnt which pump can be used at which circumstance.”*

*“The best part was being able to discuss our issues and problems in a group, with highly knowledgeable people.”*
