

# Where do new medicines come from?

Date: Friday 7 November

Time: 6.00pm – 9.00pm

Venue: The Royal Society of Medicine, London

Free for all medical students

Join us at this unique evening meeting and interactive exhibition that will focus on the process of how new medicines are made.

## The event will:

- Explore the process of new medicines from discovery and development through to the point of prescription
- Discuss the fact that the UK has traditionally been at the forefront of international medicines research
- Inform you of the ways you could contribute in developing the medicines of tomorrow and getting them swiftly to patients.

## Exhibition stands:

1. Antibiotics – timeline of resistance development
2. Development of new antibiotics – what are the challenges?
3. Careers for doctors in research and in the pharmaceutical industry
4. Drug discovery and development pathway - slides and ladders game and video
5. Understanding animal research (UAR stand)
6. ABPI code of practice and information about the pharmaceutical industry

The evening will finish with a drinks reception to which all delegates are invited
