

How Will Energy Change The Future Landscape Conference

Queen's University Belfast, UK, 20 May 2015,

Key Note : **Professor David Rooney**

Organized by **Ahmed Ibrahim Osman**

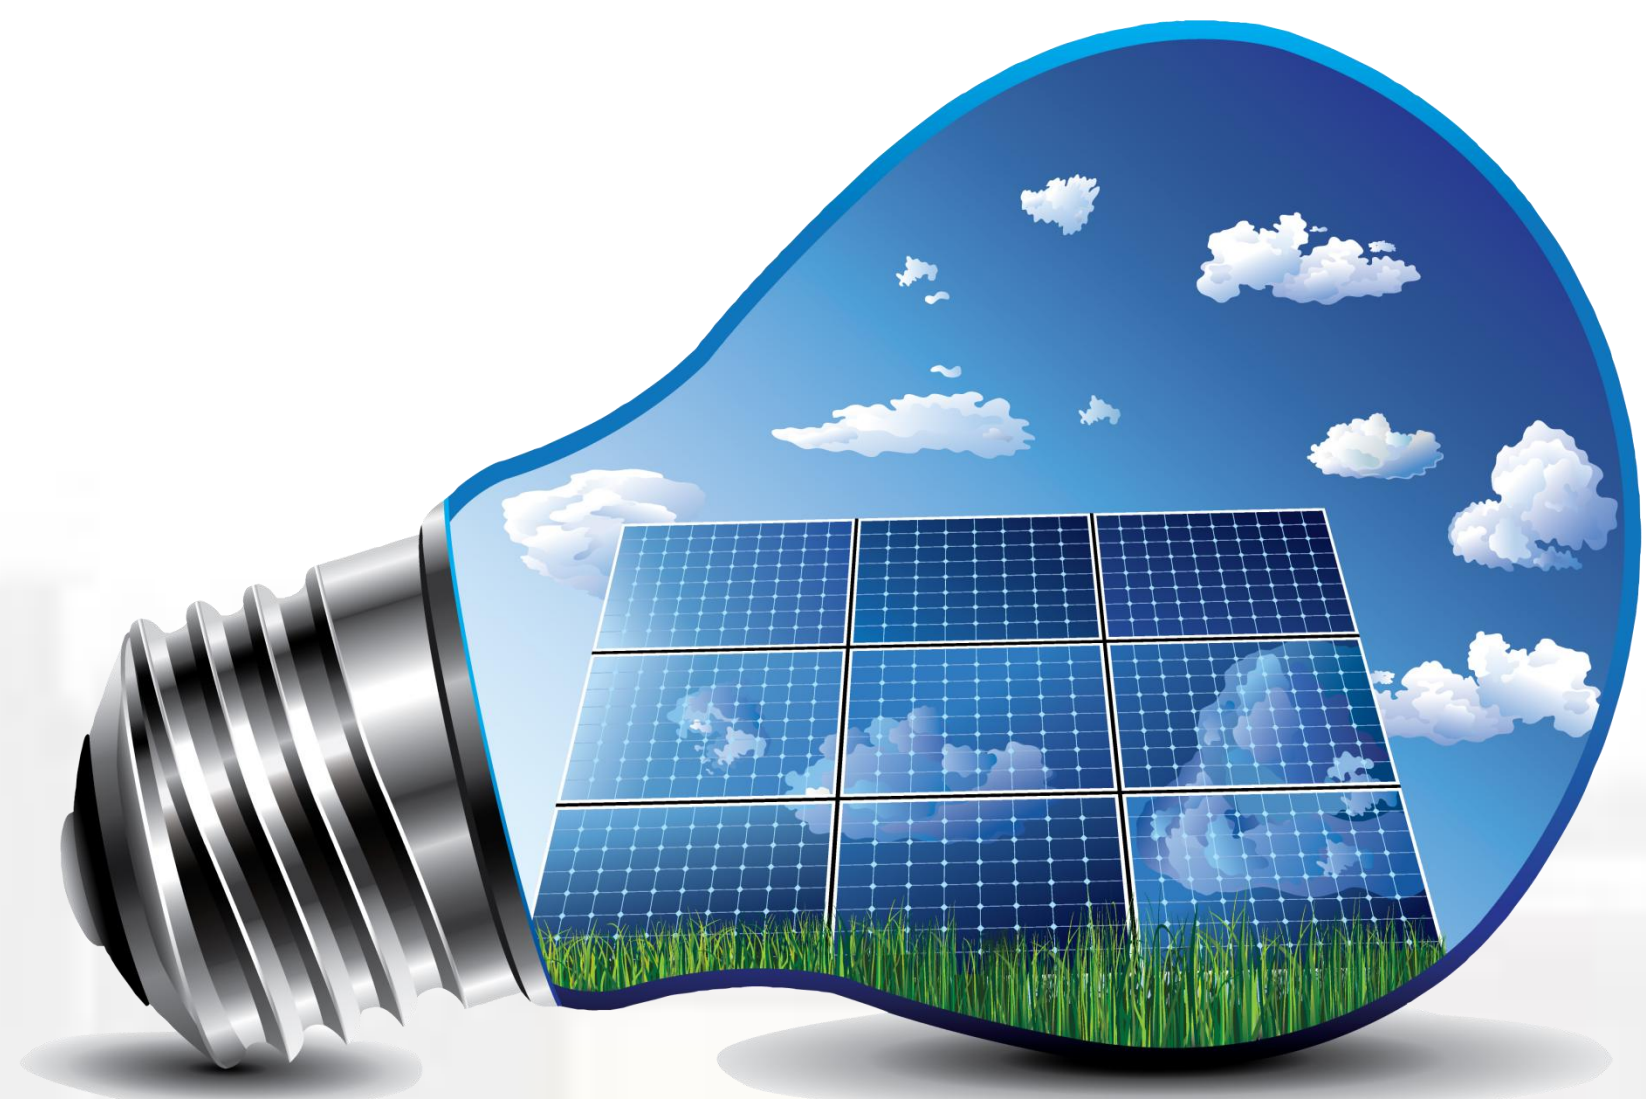

Call for Abstracts

Abstract submission email to :
aosmanahmed01@qub.ac.uk

Deadline 24 April 2015

Oral presentation : £100

Poster Presentation: £50

As important as energy is to our economy and quality of life, it isn't surprising that energy issues are in the news on a daily basis these days. Reliance on foreign energy suppliers and on fossil fuels - which contribute to climate change - is not an approach that is sustainable for our needs. Eventually, a clean, secure and sustainable energy future will be needed to revitalize our economy and sustain us for the long-term.

Conference “How will Energy change the Future Landscape” aims to bring together leading academic scientists, researchers, postgraduate students and research scholars to exchange and share their experiences and research results about all aspects of Energy, especially for Renewable Energy Researches and Applications. It also provides the leading interdisciplinary forum for researchers and postgraduate students to present and discuss the most recent innovations, trends, and concerns, practical challenges encountered and the solutions adopted in the field of Energy in total and Renewable Energy Researches and Applications in particular. The conference will be held in Queen's University Belfast, UK at 20 May 2015
