Professional Development of Chemistry Teachers Theory and Practice

Rachel Mamlok-Naaman Weizmann Institute of Science, Israel

Ingo Eilks University of Bremen, Germany

George Bodner Purdue University, USA

Avi Hofstein The Weizmann Institute of Science, Israel

Continuous professional development of chemistry teachers is essential for any effective chemistry teaching, due to the evolving nature of the subject matter and its instructional techniques. Professional development aims to keep chemistry teaching up-to-date and to make it more meaningful, more educationally effective, and better aligned to current requirements. Presenting models and examples of professional development for chemistry teachers, from pre-service preparation through to continuous professional development, the authors walk the reader through theory and practice.

Catalysis

Volume 30

James Spivey Louisiana State University, USA

Yi-Fan Han East China University of Science and Technology, China

Catalysts are required for a variety of applications and industrialists and academics are increasingly challenged to find cost effective and environmentally benign catalysts to use. This volume looks at modern approaches to catalysis and reviews the extensive literature on areas such as catalysts derived from waste materials, determining the pore structure of activated carbon by nitrogen gas adsorption and catalytic aftertreatment systems for trucks fueled by biofuels.

Chemically Derived Graphene

Functionalization, Properties and Applications

Jintao Zhang Shandong University, China

There is great interest in chemically derived graphene due to its unique properties and various potential applications including energy storage. The book provides a comprehensive overview of the recent and state-of-the-art research on chemically derived graphene materials for different applications. The key researchers in the field have contributed chapters and the book will attract a broad readership from students and researchers across materials science, chemistry, nanoengineering and related fields.

Hardback | 383 pages | ISBN 9781788010801 | £169.00 | \$237.00 | 11/05/2018
