Guide to obtaining and acknowledging figure permissions

This document will advise you on whether permissions are required for your Royal Society of Chemistry book contribution and it will guide you through obtaining and acknowledging permissions from different publishers.

Steps to Follow:
1. Determine if permissions are required for your work
2. Obtain permission from the original publisher
3. Acknowledge the original source correctly in your work
4. Complete the Royal Society of Chemistry Permissions form

If you intend to reproduce any material from another source in your chapter (e.g. a figure, diagram, scheme, table, text etc.) for which you do not own the copyright then permissions must be obtained from the original publisher or copyright holder.

The book will not enter production without this information being provided to the RSC.

1. Determine if permissions are required for your work

   Is the figure your own original, unpublished work?
   - Yes: No permission is required
   - No: Was the figure published in a RSC book or journal?
     - Yes: Have you redrawn the figure so that it is significantly different from the original?
       - Yes: Have you drawn the figure from data or information from another source?
         - Yes: Permission from the original publisher MUST be acquired and the evidence provided to the RSC
         - No: No permission required, only acknowledgement
       - No: No permission required, only acknowledgement
     - No: No permission required, only acknowledgement
Next steps

- **No permissions required**: If all figures, diagrams, schemes, tables and text in your book chapter are your own, original, unpublished work, please sign the Royal Society of Chemistry Permissions Form to confirm this.

- **Permissions required**: If you require permissions or acknowledgements for some or all of your figures, please obtain these permissions, acknowledge the original source correctly in your work, and complete the Royal Society of Chemistry Permissions Form.

2. Obtain permissions from the original publisher

It is the responsibility of the chapter author to obtain permissions, including paying any fees, for your figures, diagrams, schemes, tables and text. You must also provide the appropriate acknowledgement text in the caption in the format prescribed by the copyright owner (see Step 3).

**Requesting permission**

The easiest way to obtain permission to reproduce a figure is using RightsLink. The majority of publishers use this service. If the publisher of the figure you wish to reproduce does not use RightsLink, you can request permissions directly from the publisher. There is often a link or email address on the publisher website for permission requests, which will either link you to RightsLink or to another method for obtaining permissions. If the publisher does not use RightsLink and does not have their own specific procedure for permissions requests, please complete the Permissions Request for non-RSC Material form and send it to books@rsc.org or editor of the relevant publication.

Ensure that you allow plenty of time to obtain permission for re-used figures, as the permissions form and evidence should be supplied with your chapter to the Editor. It can take anything from a few minutes to several months to obtain permission, depending on the amount of material and the responsiveness of the sources.

**Information you may need for RightsLink**:

- The Royal Society of Chemistry is a STM signatory publisher
- The Royal Society of Chemistry is a non-profit organisation, although books are sold commercially
- Books will be published in both Print and Electronic formats
- Book title and Editor/Author details
- Print run / distribution
- Length of book
- Publication date
- Price
- ISBN

The Editorial Office at books@rsc.org can provide any necessary details.
Obtaining permission through RightsLink

1. Go to the journal article that the figure has come from, and from there click “rights and permissions” (this may not always be on the front of the article page). You will have to sign up for your own RightsLink account.

2. Once you have requested permission, a pop-up window should open so that you can apply via RightsLink. If you are unsure of any details, please contact books@rsc.org.
3. With some publishers, you will need to enter further information about the book you are contributing to. If you are unsure of any of these details, please contact books@rsc.org.
4. You will then be able to review and accept your order.

5. Once you have accepted your order, you will receive an order confirmation. Please save the Printable License as a PDF, and send this with your completed Permissions form to the Editor when you are submitting your chapter.
If you need any assistance with RightsLink, information can be found at the following links:

http://support.copyright.com/index.php?action=article&id=27&relid=3
http://support.copyright.com/index.php?action=article&id=96&relid=18

Next steps

Proof of permissions obtained: Check your RightsLink license or relevant documentation for how the publisher wishes the figure to be acknowledged.

Proof of permissions not obtained: Contact the publisher directly or email books@rsc.org

3. Acknowledge the original source correctly in your work

You must acknowledge the original source in the figure caption, as requested by the publisher. Some examples are given below but the requirements are different for each publisher and each journal.

Royal Society of Chemistry
Formal permissions do not need to be requested but the original source must be acknowledged in the figure caption as follows:

<table>
<thead>
<tr>
<th>All RSC publications except those below</th>
<th>Reproduced/Adapted from ref. XX with permission from The Royal Society of Chemistry</th>
</tr>
</thead>
<tbody>
<tr>
<td>New Journal of Chemistry</td>
<td>Reproduced/Adapted from ref. XX with permission from the Centre National de la Recherche Scientifique (CNRS) and the Royal Society of Chemistry.</td>
</tr>
</tbody>
</table>
The correct wording for crediting a figure from another publisher can usually be found in your RightsLink License. For some publishers this may appear on the second or third pages of the Terms and Conditions.

Please ensure you check your RightsLink License for the correct wording for crediting the original source. Publishers will usually specify the way in which they would like to be credited.

Examples:

American Chemical Society
Reprinted (adapted) with permission from (COMPLETE REFERENCE CITATION). Copyright (YEAR) American Chemical Society.

Elsevier
Reprinted from Publication title, Vol /edition number, Author(s), Title of article / title of chapter, Pages No., Copyright (Year), with permission from Elsevier [OR APPLICABLE SOCIETY COPYRIGHT OWNER]. Also Lancet special credit - "Reprinted from The Lancet, Vol. number, Author(s), Title of article, Pages No., Copyright (Year), with permission from Elsevier.

Nature
Reprinted by permission from Macmillan Publishers Ltd: [JOURNAL NAME] (reference citation), copyright (year of publication).
Springer

“Springer book/journal title, chapter/article title, volume, year of publication, page, name(s) of author(s), (original copyright notice as given in the publication in which the material was originally published) "With permission of Springer"

Wiley

Permission is granted subject to an appropriate acknowledgement given to the author, title of the material/book/journal and the publisher. You shall also duplicate the copyright notice that appears in the Wiley publication in your use of the Wiley material.

Formatting:

- Author names should be initial followed by a full stop then surname
- Journal or book titles should be italicised
- Journal volume numbers should be bold
- If a page range is given the last number should be written out in full

Where the copyright holder does not give precise instructions as to what reference content should be included within the acknowledgement or the order it should appear, the following format can be used:

Next steps

Once permissions have been obtained and correctly acknowledged, complete the Royal Society of Chemistry Permissions form.

4. Complete the Royal Society of Chemistry Permissions form

Please note we cannot publish your work without this signed form, proof of your permissions and confirmation that your reproduced figures have been correctly acknowledged.

The Permissions Form will have been sent to you by your Editorial Assistant at the Royal Society of Chemistry.

If no permissions for your work are required, please tick the first box on the signature page and sign the form. Submit this form together with your chapter to the Editor or to the Royal Society of Chemistry with your typescript if your book is authored.

If permissions or acknowledgements are required, please complete the table on the last page of the form, listing all figures. If any figures are your own, please state this in the table. You should give the full source reference and include how you have acknowledged the figure in the figure caption. Tick the second box on the signature page and sign and submit the form and proof of permissions for all of your figures that require them to the Editor together with your chapter.
**Frequently Asked Questions**

- **If I redraw an image do I still need to obtain permission?**
  If the redrawn image is significantly different from the original, acknowledgement only may be needed, but you will need to check with the Copyright holder. You should also confirm with the original publisher that you are permitted to redraw the figure.

- **Do I need permission to reuse my own images which have already been published?**
  It depends on the publisher’s policy. Generally copyright is with the Publisher so you will have to check if permission is required.

- **Do I need permission if all my figures are from Open Access articles?**
  It depends on the Open Access license. If the original article is published under a NC license (non-commercial) then you will need to contact the publisher and possibly the original authors. You will also need to provide a link to the original license in your figure caption. You can find more information about Open Access licenses here: [https://creativecommons.org/licenses/](https://creativecommons.org/licenses/).

- **Does every author of a chapter need to sign the Copyright and Permissions Form?**
  Only the lead author need sign the form, as long all figures in the chapter are covered.

- **Do I need to submit a form if I have no images or tables in my chapter?**
  Yes, you still need to confirm that the text in your work has not been directly copied from another source.

- **If payment of a fee is required to clear permission for the use of a figure does the Royal Society of Chemistry cover this expense?**
  If RightsLink is requesting payment for figure re-use, please ensure that your request has been completed correctly, as generally permission should be provided free of charge if the original publisher is a STM signatory. If payment is required, the Royal Society of Chemistry is unable to pay this on behalf of the authors.
