

Annual Report of the Mössbauer Discussion Group 2006

The committee met on the 12th of September at the London Centre for Nanotechnology. The group members continue to find value in having scientific meetings in the field of Mössbauer Spectroscopy and therefore have proposed to schedule the next scientific meeting on the 11th of September 2007 in London. ICAME07 will be held in October in India.

Dr David Evans was able to supply details of a company he has used to dispose of spent Mössbauer Spectroscopy sources. The company is Safeguard International (www.safeguard-international.com).

During the Sixth Workshop on Mössbauer Spectroscopy, Seeheim, Germany 7 - 11 June 2006, Dr Sue Forder, Prof Frank Berry and Dr Mike Thomas presented their work. The group also decided to consider financial support for group members who wish to present their Mössbauer Spectroscopy results at conferences and also to support visitors to the UK working in the field.

Our Chair, Prof Quentin Pankhurst, decided to relinquish his position as did Dr George Fern. The group then nominated Dr George Fern as the new Chair and Dr Sue Forder as the new Secretary. Dr David Evans will remain as the Treasurer. Prof Pankhurst was thanked for all he had done as Chair of the group.

George Fern
Secretary of Mössbauer Discussion Group
