Chemical Sciences

Chemistry Education Research and Practice

January 2007
ISSN 1109-4028

Volume 8, Issue no 1
Pages 1-104

Contents

Papers

Factors that influence pupil engagement with science simulations: the role of distraction, vividness, logic, instruction and prior knowledge1-12

Susan Rodrigues

Results of an interview study as basis for the development of stepped supporting tools for stoichiometric problems.....13-31

Martin Fach, Tanja de Boer and Ilka Parchmann

Predicting at-risk students in general chemistry: comparing formal thought to a general achievement measure32-51

Scott E. Lewis and Jennifer E. Lewis

Primary teachers' views and descriptions regarding some science activities.....52-60

George Papageorgiou, Efthalia Kogianni and Nicolaos Makris

New visualization tools for learning molecular symmetry: a preliminary evaluation.....61-72

Inbal Tuvi-Arad and Paul Gorsky

Lectures: electronic presentations versus chalk and talk, a chemist's view73-79

Dudley E. Shallcross and Timothy G. Harrison

Formative peer and self feedback as a catalyst for change within science teaching.80-92

Simon Bedford and Serena Legg

Strengthening conceptual connections in introductory chemistry courses.....93-100

George M. Bodner

Letter

Dudley E. Shallcross and Timothy G. Harrison.....101-104

A secondary School Teacher Fellow within a university chemistry department: the answer to problems of recruitment and transition from secondary school to University and subsequent retention?

This is a themed issue on Experiments and the Laboratory in Chemistry Education.

Guest editors: Avi Hofstein and Rachel Mamlok-Naaman

Contents

Papers

[The laboratory in science education: the state of the art.....105-107](#)

Avi Hofstein and Rachel Mamlok-Naaman

[A lesson plan on ‘methods of separating matter’ based on the Learning Company Approach – A motivating frame for self-regulated and open lab-work in introductory secondary chemistry lessons.....108-119](#)

Torsten Witteck, Bettina Most, Stephan Kienast and Ingo Eilks

[The project CHEMOL: Science education for children – Teacher education for students!.....120-129](#)

Mirjam Steffensky and Ilka Parchmann

[Developing practical chemistry skills by means of student-driven problem based learning mini-projects.....130-139](#)

Claire Mc Donnell, Christine O’Connor and Michael K Seery

[Students’ perceptions of when conceptual development occurs during laboratory instruction140-152](#)

Daniel S Domin

[Matching Higher-Order Cognitive Skills \(HOCS\) promotion goals with problem-based laboratory practice in a freshman organic chemistry course153-171](#)

Uri Zoller and David Pushkin

[The role of laboratory work in university chemistry.....172-185](#)

Norman Reid and Iqbal Shah

[Using lecture demonstrations to promote the refinement of concepts: the case of teaching solvent miscibility.....186-196](#)

Guy Ashkenazi and Gabriela C. Weaver

[Interactive lecture demonstrations: a tool for exploring and enhancing conceptual change.....197-211](#)

Rachel Zimrot and Guy Ashkenazi

[A rubric to characterize inquiry in the undergraduate chemistry laboratory.....212-219](#)

Michael E. Fay, Nathaniel P. Grove, Marcy Hamby Towns and Stacey Lowery Bretz

The integration of a viscosity simulator in a chemistry laboratory.....220-231
Maria Limniou, Nikos Papadopoulos, Andreas Giannakoudakis, David Roberts and Oliver Otto

Advancing Chemistry by Enhancing Learning in the Laboratory (ACELL): a model for providing professional and personal development and facilitating improved student laboratory learning outcomes232-254
Mark A. Buntine, Justin R. Read, Simon C. Barrie, Robert B. Bucat, Geoffrey T. Crisp , Adrian V. George, Ian M. Jamie and Scott H. Kable

Educational analysis of the first year chemistry experiment ‘Thermodynamics Think-In’: an ACELL experiment255-273
Justin R. Read and Scott H. Kable

July 2007
ISSN 1109-4028

Volume 8, Issue no 3
Pages 274-361

Contents

Papers

The modelling ability of non-major chemistry students and their understanding of the sub-microscopic level274-292
Gail Chittleborough and David F. Treagust

The development of a two-tier multiple-choice diagnostic instrument for evaluating secondary school students’ ability to describe and explain chemical reactions using multiple levels of representation293-307
A. L. Chandrasegaran, David F. Treagust and Mauro Mocerino

Use of a multimedia DVD for Physical Chemistry: analysis of its effectiveness for teaching content and applications to current research and its impact on student views of physical chemistry308-326
Katherine T. Jennings, Erik M. Epp and Gabriela C. Weaver

Combination of Phenomenography with Knowledge Space Theory to study students’ thinking patterns in describing an atom327-336
Zoltán Tóth and Lajos Ludányi

Using home-laboratory kits to teach general chemistry337-346
Dietmar Kennepohl

Providing solutions through problem-based learning for the undergraduate 1st year chemistry laboratory.....347-361
Orla C. Kelly and Odilla E. Finlayson

Contents

Papers

Learning about stoichiometry: from students' preconceptions to the concept of limiting reactant.....362-375

Laure Gauchon and Martine Méheut

Mapping students' knowledge structure in understanding density, mass percent, molar mass, molar volume and their application in calculations by the use of the knowledge space theory376-389

Zoltán Tóth

Evaluation of student engagement with two learning supports in the teaching of 1st year undergraduate chemistry390-402

James Lovatt, Odilla E. Finlayson and Paraic James
