# Chemistry Education Research and Practice

Published quarterly by The Royal Society of Chemistry

**RS•C**  
ROYAL SOCIETY OF CHEMISTRY

# Chemistry Education Research and Practice

January 2005

Volume 6, Issue No 1

---

## Papers

**Factors related to observed attitude change toward learning chemistry among university students.....1-18**  
*C. Anders R Berg*

## Special section

### Teaching and learning acids and bases

**Textbooks' and teachers' understanding of acid-base models used in chemistry teaching.....19-35**  
*Michal Drechsler and Hans-Jürgen Schmidt*

**Conceptual change achieved through a new teaching program on acids and bases.....36-51**  
*Gökhan Demircioğlu, Alipaşa Ayas and Hülya Demircioğlu*

**Traditional and computer-assisted learning in teaching acids and bases.....52-63**  
*Inci Morgil, Soner Yavuz, Özge Özyalçın Oskay and Seçil Arda*

April 2005

Volume 6, Issue No 2

---

## Papers

**Evaluation of computer-based learning material for food chemistry education .....64-82**  
*Julia Diederer, Harry Gruppen, Rob Hartog and Alphons G. J. Voragen*

**Identifying pedagogical content knowledge (PCK) in the chemistry laboratory ....83-103**  
*Janet Bond-Robinson*

**Conceptual understanding versus algorithmic problem solving: Further evidence from a national chemistry examination.....104-118**  
*Dimitrios Stamovlasis, Georgios Tsaparlis, Charalambos Kamilatos, Dimitrios Papaoikonomou, and Erifyli Zarotiadou*

July 2005

Volume 6, Issue No 3

---

## Papers

**Atom and molecule: upper secondary school French students' representations in long-term memory .....119-135**  
*Aytekin Cokelez and Alain Dumon*

**Molecular visualization in chemistry education: the role of multidisciplinary collaboration .....136-149**  
*Loretta L. Jones, Kenneth D. Jordan and Neil A. Stillings*

**The strategies used by distance education students when learning basic chemistry; implications for electronic delivery .....150-165**  
*Robert Lyall*

**Using a context-based approach to undergraduate chemistry teaching – a case study for introductory physical chemistry .....166-179**  
*Simon T. Belt, Mathias J. Leisvik, Andrew J. Hyde and Tina L. Overton*

October 2005

Volume 6, Issue No 4

---

**Papers**

**The ionisation energy diagnostic instrument: a two-tier multiple-choice instrument to determine high school students' understanding of ionisation energy ..... 180-197**  
*Kim-Chwee Daniel Tan, Keith S. Taber, Ngoh-Khang Goh and Lian-Sai Chia*

**Computer aided self assessment – an effective tool.....198-203**  
*Roy Lowry*

**Assessment formats: do they make a difference?.....204-212**  
*Eleni Danili and Norman Reid*
