

Contents

<i>Chapter 1</i>	Introduction
<i>Chapter 2</i>	Sugars <ul style="list-style-type: none">MonosaccharidesOligosaccharidesSugars as SolidsSugars in SolutionDecomposition (incl. The Maillard Reaction)Special Topics (Reducing group reactions; Sugar cane, sugar beet and tequila; Monosaccharide conformations; Acrylamide)
<i>Chapter 3</i>	Polysaccharides <ul style="list-style-type: none">StarchPectinsSeaweed PolysaccharidesCellulose, Hemicelluloses and FibreGumsSpecial Topics (Chemically modified starches; Syrups from starch; Glycaemic Index; More details of pectin structure)
<i>Chapter 4</i>	Lipids <ul style="list-style-type: none">Fatty Acids - Structure and DistributionConjugated linoleic acidsEssential Fatty AcidsFatty acids and coronary heart diseaseReactions of Unsaturated Fatty AcidsHydrogenation, margarine and trans fatty acidsRancidityAntioxidantsTriglyceridesMelting and crystallisationCocoa butter and chocolateFractionationInteresterificationPolar LipidsMilk fat, cream and butterPhytosteroidsSpecial Topics (Hydrogenation in detail; Singlet and triplet oxygen; Triglyceride crystals)
<i>Chapter 5</i>	Proteins <ul style="list-style-type: none">Amino AcidsProtein StructureEssential Amino Acids and Protein QualityAnalysisFood Protein Systems (Milk; Cheese; Eggs; Meat; Bread)Special Topics (Myoglobin and free radicals; Wheat genes and chromosomes; More details of gluten proteins)

Chapter 6	Colours <ul style="list-style-type: none">ChlorophyllsCarotenoidsAnthocyaninsBetalainsMelanins (incl. Tea)Turmeric and CochinealArtificial Food Colorants (incl. Restrictions on the use of colours)The Molecular Basis of ColourSpecial Topics (Flavonoids, tannins and health; Colour measurement)
Chapter 7	Flavours <ul style="list-style-type: none">Taste (Sweetness; Bitterness; Saltiness; Sourness; Astringency; Pungency; Meatiness)Odour (Meat; Fruit; Vegetables; Herbs and spices; Synthetic flavourings)Special Topics (Off-flavours in meat; Taints)
Chapter 8	Vitamins <ul style="list-style-type: none">ThiaminRiboflavinPyridoxineNiacinCobalaminFolic AcidBiotin and Pantothenic AcidAscorbic AcidRetinolCholecalciferolVitamin EVitamin KSpecial Topics (Details of the coenzyme functions of thiamine and pyridoxine; More details of the role of ascorbic acid; Non-Vitamins)
Chapter 9	Preservatives <ul style="list-style-type: none">Sodium ChlorideNitritesSmokeSulfur DioxideBenzoatesOther Organic AcidsNisin and NatamycinIrradiation

Chapter 10	Undesirables <ul style="list-style-type: none">Endogenous Toxins of Plant Foods (incl. alkaloids; vasopressor amines; cyanogens; phytoestrogens, <i>etc.</i>)Endogenous Toxins of Animal Foods (fish and shellfish toxins)MycotoxinsBacterial ToxinsAllergensToxic Agricultural Residues (incl. pesticides, hormones, nitrate)Toxic Metal Residues (Lead; Mercury; Arsenic; Cadmium; Tin and aluminium)Toxins Generated During Heat Treatment of FoodPackaging ResiduesEnvironmental PollutantsSpecial Topics (Favism; The total intake of undesirable metals)
Chapter 11	Minerals <ul style="list-style-type: none">The Bulk Minerals (Sodium; Potassium; Magnesium; Calcium; Phosphorus)The Trace Minerals (Iron; Copper; Zinc; Selenium; Iodine; Others)
Chapter 12	Water <ul style="list-style-type: none">Water StructureInteractions of Water with Food ComponentsInteractions of Water with Food MaterialsWater BindingWater Determination
Appendix	Nutritional Requirements and Dietary Sources
