

**Innovation Remit**

- Review the innovation strategies of organisations, such as the Chemistry Innovation Network and the Regional Development Agencies, who will have an impact on chemical science based companies and members in those companies
- Act in an advisory capacity to these organisations and reinforce their strategies as appropriate
- Identify distinctive opportunities for the Industry and Technology Forum to help those involved in the chemical sciences to develop an innovative and entrepreneurial culture
- Plan and implement activities that will help support individuals to innovate. These should include technology innovation as well as business innovation and should involve both mature and emerging chemical science related industries.
- Reward, promote and publicise innovative entrepreneurs, teams and creative individuals to inspire and educate others
