

Education Division

Mission statement

The role of the Division is to foster the knowledge and understanding of, and an engagement with, all aspects of the Chemical Sciences that relate to learning, teaching and communication. This is achieved through the guidance of the Council of the Division acting to:

- identify and address key issues in teaching and learning
- support those involved in education and in the development of good practice
- effect a synergy between education practice and research
- forge cooperation and exchange in teaching and educational research with groups worldwide
- represent a lobbying voice for the enhancement of the quality of learning and teaching in the Chemical Sciences
