

About the Series

ISSN: 2048-7681

Series Editors: Hans-Jürgen Butt, Max-Planck-Institute for Polymer Research, Germany

Ian W. Hamley, University of Reading, UK

Howard Stone, Princeton University, USA

Chi Wu, The Chinese University of Hong Kong, China

Overview

The RSC Soft Matter Series is a new collection of professional reference titles providing an essential overview of the recent developments in soft matter research. Covering a broad scope, the series encompasses synthesis, self-assembly, dynamics and both soft matter and bio-systems, this includes colloids, emulsions, films, gels, biomimetic materials and membranes.

The series will appeal to academic researchers, advanced undergraduate and postgraduate students, and professional researchers in industry working in soft matter science, materials science; surface science, physics, biochemistry, biology, biophysics, chemical engineering; physical chemistry, organic chemistry and theoretical chemistry.

New and Forthcoming Series Titles

Functional Molecular Gels

Beatriu Escuder, Universitat Jaume I, Spain

Juan F Miravet, Universitat Jaume I, Spain

Hardback | 332 pages | 9781849736657 | 2013 | £149.99 | \$240.00

Hydrogels in Cell-Based Therapies

Che J Connon, University of Reading, UK

Ian W Hamley, University of Reading, UK

Hardback | 238 pages | 9781849737982 | 2014 | £155.00 | \$255.00

Particle-Stabilized Emulsions and Colloids

To Ngai, The Chinese University of Hong Kong, China

Stefan Bon, University of Warwick, UK

Hardback | 322 pages | 9781849738811 | 2014 | £175.00 | \$290.00

Fluid-Structure Interactions in Low-Reynolds-Number Flows

Camille Duprat, Princeton University, USA

Howard A Stone, Princeton University, USA

Hardback | 325 pages | 9781849738132 | 2015 | £155.00 | \$250.00

RSC Soft Matter

The Royal Society of Chemistry is the world's leading chemistry community, advancing excellence in the chemical sciences. A not-for-profit organisation with 170 years of history, we promote, support and celebrate chemistry and work to shape the future of the chemical sciences – for the benefit of science and humanity.

Book publication is a key part of our work to invest in the chemical sciences. Now approaching 1,300 titles, our collection features titles from authors around the globe and spans 46 years of research, supporting our international vision for the future.

As with all of our published material, our books portfolio is high quality and wide-ranging, covering professional reference books, specialist reports, textbooks and popular science titles.

Our series are similarly comprehensive. Enthusiastically led by an editorial board of high calibre, every new proposal is peer-reviewed by two independent experts.
