DIVISIONS AND FORUMS

Divisions and Forums are broad-based groups of RSC members. Their role is to monitor development, research and education and training in their respective field of the RSC via one of its Boards.

Membership is **free** and open to all RSC members to join as many divisions and forums as they wish. By joining you will be able to pursue your own particular area of interest as well as interacting with members involved in other areas of the chemical sciences.

For more information go to
www.rsc.org/divisionsandforums

SPECIALIST INTEREST GROUPS

The RSC Groups play an important role in contributing to the many RSC activities in support of the chemical sciences. Each Group is devoted to a specific subject area or application of the chemical sciences and several of the Groups are organised jointly with other societies with similar interests.

In addition to **arranging scientific meetings**, several Groups produce their own **newsletters** and many provide **bursaries** to help students attend conferences.

Details of meetings organised by the Groups can be found by visiting the relevant Groups homepage

www.rsc.org/interestgroups

RSC Members may join Groups at any time by completing the tear off form at the back of this leaflet and sending it to the Membership Administration Department.

You can also join by:

- Contacting the Membership Administration Department directly
Tel +44 (0) 1223 432141 **Email** subsrecords@rsc.org
- Via the relevant Groups homepage
- Selecting the Groups of your choice when you renew your annual membership
