All the melting points were measured using micro melting point apparatus. The IR spectra were obtained on a HORIBA FT-710 spectrometer. The \(^1\)H-NMR spectra were obtained on a JMN-A400 spectrometer (400 MHz) in CDCl\(_3\) using TMS as an internal standard. \(^13\)C-NMR spectra were obtained on a JMN-A400 spectrometer (100 MHz) in CDCl\(_3\) using TMS as internal standard. Mass spectra were obtained on a JEOL-JMS-D300 mass spectrometer. The elemental analyses were performed by using a Yanaco CHN-corder MT-5. All the reactions were monitored by thin layer chromatography (TLC) using Merck, Kieselgel 60 F\(_{254}\). Column chromatography and Preparative thin layer chromatography (PLC) was performed on a Merck, Kieselgel 60 PF\(_{254}\).
