Fig. S1. (A) Schematic showing the effect of a 5 nm silver island film upon XEOL from a single layer of Gd$_2$O$_2$S:Eu phosphors. Region A: uncoated reference; Region B: silver coated below phosphor; Region C, silver placed on a glass slide below; Region D, silver coated above. Above each region, the measured attenuation at 617 nm is labeled. (B) Luminescence spectra from regions A-D.
