Supporting Information

**Fig. S1.** (A) DPVs obtained for $\alpha$-Fe$_2$O$_3$ nanofibers modified GC electrode in 0.2 M PB solution containing 100 µM FA at pH values of 5.2, 6.2, 7.2, 8.2, 9.2 and 10.2 (a – f). (B) shows effect of pH on the anodic peak current.
