On Page 53, in the last paragraph, the name East Cattie Cottage should read: Easter Cattie Cottage.

The subheading to Section 7.4 on Page 83 should read: Pastry Wars: 48 Dead, 300 Injured.

The heading to Section 8.5 on Page 98 should read: MURDER, WEYBRIDGE, SURREY, 2012.

The boiling point of ethylene glycol as given in its entry in the Glossary on Page 207 is incorrect. This should be 197 °C.

There is an entry missing from the Glossary, with the corresponding term located on Page 147. This should read:

**Tubocurarine**

![Tubocurarine molecule](image)

The chemical name for this is 7',12'-dihydroxy-6,6'-dimethoxy-2,2',2'-trimethyltubocuraran-2'-ium and its chemical formula is C₃₇H₄₁N₂O₆²⁺. As such, it is a doubly positive ion and needs to be accompanied by negative ions such as two chlorides Cl⁻. Tubocurarine is the main ingredient of curare. It is very soluble in water.
