Supplemental Information

Figure S1. The conversion of xylose (750 mM) and the yield of furfural at 140 °C catalyzed by 25 mM SnCl₄ in a single aqueous phase with and without 50 mM HCl.
A. 

Figure S2. The partition coefficients for A) furfural and B) 5-HMF between water and the organic solvents benzene, toluene, n-butanol, and MIBK determined using UNIFAC.
