Chemistry

General methods: Melting points were determined with an Electrothermal IA9300 digital melting point apparatus and are uncorrected. 1H and 13C NMR spectra were recorded on a Bruker Avance 400 spectrometer (400 MHz). Chemical shifts (δ) are expressed in ppm relative to tetramethylsilane as internal standard. NMR signals are described as follows: s=singlet, d=doublet, t=triplet, q=quadruplet, sext=sextuplet, m=multiplet and br=broad. Coupling constants (J) are given in hertz. Infrared spectra (IR) were recorded on a Shimadzu IRAffinity-1 IR-FT spectrophotometer equipped with a MIRacle 10 accessory ATR. Only the most significant absorption bands are reported. Electrospray mass spectrometric analysis was performed on a Waters Acquity UPLC System ZQ 2000 single quadrupole. All tested compounds displayed purity of >97%. All reactions were monitored by thin-layer chromatography (TLC) using 0.2-mm-thick silica gel plates 60 F254 (5735 Merck). Column chromatography was carried out with silica gel 60 (70–230 mesh, ASTM, Merck). Chemicals and solvents used were commercially available. Elemental analyses were performed on a Thermo Scientific Elemental Analyzer Flash EA 1112 and were found to be within ±0.4% of theoretical values.

Biological evaluation

In vitro kinase inhibition assay

Recombinant kinases were purchased from Millipore or ProQinase. An AlphaScreen Protein-A Detection Kit (PerkinElmer) was used to quantify kinase activity. For the assessment of IC\textsubscript{50} values, compounds were tested at ten final concentrations between 3.16 nm and 100 \(\mu\)M. Each kinase, 10 \(\mu\)M ATP, kinase substrate, and the test compound were incubated for 1 h on a 384-well Optiplate in a final volume of 15 \(\mu\)L. The kinase reaction was stopped by adding 10 \(\mu\)L Alpha Beadmix. The readout was performed the following morning using an Envision reader (PerkinElmer). IC\textsubscript{50} values were calculated with GraphPad Prism software. Kinase testing was performed by the Target Lab (Dr. Seipelt, Preclinical Development) at Æterna Zentaris GmbH, Frankfurt/Main (Germany).
