Simultaneous adsorption of Cd(II) and phosphate on Al$_{13}$ pillared montmorillonite

Lingya Ma$^{a,b,c}$, Jianxi Zhu$^{a,d}$, Yunfei Xi$^{b,*}$, Runliang Zhu$^{a,d}$, Hongping He$^{a,d,**}$, Xiaoliang Liang$^{a,d}$, Godwin A. Ayoko$^{b}$

Supplementary material

**Fig. S1** Correlations between the removal of phosphate by AlPMt and the equilibrium pH in the single adsorption system. The initial pH of solutions is pH 5.0.
