Fig. S1 (a) Ozone decomposition as a function of time and (b) Rct plots at various pH values.

Experimental conditions: SRFA = 2.0 mg/L, temperature = 21±1ºC, initial ozone concentration = 0.1 mM, tert-butanol = 0.1 mM, pCBA = 0.5 µM and phosphate buffer = 1.0 mM.
Fig. S2 (a) Ozone decomposition as a function of time and (b) $R_{ct}$ plots for temperature ranging from 12.0°C to 50.5°C. Experimental conditions: SRFA = 2.0 mg/L, pH 7.0, initial ozone concentration = 0.1 mM, tert-butanol = 0.1 mM, pCBA = 0.5 µM and phosphate buffer = 1.0 mM.
