The graph shows the cell viability (%) at different concentrations of Dox (Doxorubicin) for various polymers: PAA7:3-g-PEG5000/2PEG4000-Fa, PAA8:2-g-PEG5000/PEG4000-Fa, PAA7:3-g-2PEG5000/PEG4000-Fa. The x-axis represents the Dox concentration in μg/mL, and the y-axis represents cell viability percentage.
