Figure S1. A scheme of the Z-scan measurement technique: (1) pulse laser, (2) focusing lens, (3) sample moved along the beam direction from \(-z\) to \(+z\) range, (4) aperture with a 0.1 cm hole in the center, and (5) photodetector.

Figure S2. Molecular structure of complex (1), (30\% probability ellipsoids). Hydrogen atoms are omitted for clarity.

Figure S3. Crystal packing of complex (1). Hydrogen atoms and solvate molecules are omitted for clarity.

Figure S4. HR ESI-MS spectrum of complex (1).
