Table of Content

1. Real-time monitoring of the SWV response of [Os(bpy)2dppz]2+ and MB at different concentrations in an LAMP solution (Figure S1)
2. Influence of the LAMP adjuvants on the UV-visible spectra of NB as a function of incubation time at 65°C (Figure S2)
3. Effect of the stepwise addition of a pyrophosphate solution to SWV response of Ru(NH3)63+ in an LAMP solution (Figure S3)
1. Real-time monitoring of the SWV response of \([\text{Os( bpy)}_2\text{dppz}]^{2+}\) and MB at different concentrations in an LAMP solution.

*Figure S1.* Real-time monitoring of the SWV response of (A) \([\text{Os( bpy)}_2\text{dppz}]^{2+}\) or (B) MB at different concentrations in an LAMP solution (50 µL of solution containing all of the required reagents for LAMP but no DNA target) held at 65°C. From bottom to top: (A) 0.5, 1, 2, 5, 10, and 15 µM \([\text{Os( bpy)}_2\text{dppz}]^{2+}\); (B) 2, 5, 10, 15, 20, 25 µM MB.
2. Influence of the LAMP adjuvants on the UV-visible spectra of NB as a function of incubation time at 65°C.

Figure S2. UV-visible spectra of 5 µM NB as a function of incubation time at 65°C in: (A) a 1× TB solution or (B) an LAMP mixture (i.e., 1× TB buffer + 0.025 % wt BSA + 1 wt % PVP + 1 mM betaine + 400 µM of each of the dNTPs + 0.32 U of Bst 2 WarmStar DNA polymerase). (C) Same as in B but without NB. (D) Same as in A but with 1 wt % PVP.
3. Effect of the stepwise addition of a pyrophosphate solution to SWV response of Ru(NH$_3$)$_6^{3+}$ in an LAMP solution.

**Figure S3.** Real-time monitoring of the SWV response of Ru(NH$_3$)$_6^{3+}$ (15 µM) in an LAMP solution (50 µL of solution containing all of the needed reagents for LAMP except dNTPs) held at 65°C and during the stepwise addition (0.2 µL) of a pyrophosphate solution (0.1 M). The blue and red curves are duplicated experiments (the 4 injection times of pyrophosphate are specified on the graph by the corresponding blue and red arrows). The black curve is a control experiment with (black arrows) 4 × 0.2 µL injection of water at the end of the experiment to check for dilution effects on the SWV response.
