Fig. S1 EGCG binds to 67LR as an oligomer form.

A. The neutralising activity of LR 161-170 on the EGCG-induced inhibition of cancer cell growth. EGCG plus peptide (closed bar) are shown as the cell number relative to EGCG-nontreated control (open bar). Data, means ± S.D. (n = 3). *, p < 0.05, **, p < 0.01. B. The illustration of FRET system. C. The expression of 67LR on si-Cont. or si-67LR transfected HEK293 cells.
