Electronic supplementary information. Aortic and heart sections from obese db/db mice fed with raspberry supplemented diet or control diet.

**Control**  **Raspberry**

(A) Aortic sections used to measure aortic intima-media thickness (bar = 100 µm, 20X). (B) Heart tissue sections with collagen deposits in blue (bar = 50 µm, 40X). Diabetic (db/db) (BKS.Cg-Dock7m +/+ Leprdb/OlaHsd) mice were fed AIN-93G diet (control) or isocaloric AIN-93G raspberry supplemented diet (raspberry) for 8 weeks. Sections were stained with Masson’s trichrome blue.
