In Situ Formed Acetal Facilitated Direct Michael addition of Unactivated Ketones

Srinivasa Rao Koppolu and Rengarajan Balamurugan*

School of Chemistry, University of Hyderabad, Prof. C. R. Rao road, Gachibowli, Hyderabad 500046 INDIA

E-mail: rbsc@uohyd.ernet.in

Submitted to New J. Chem

Supporting Information
SRK-1496
NMR experiment for check the formation of acetal

(1 equiv. Acetophenone, 1 equiv. TMOF, 0.5 equiv. TfOH)
After 30 min; CDCl$_3$:CCl$_4$ (1:1)
After 2 h; CDCl₃:CCl₄ (1:1)
