Electronic Supplementary Information

Graphene as a photothermal actuator for control of lipid mesophase structure

Matthew D. J. Quinn, Tao Wang, Joanne D. Du, Ben J. Boyd, Adrian Hawley, and Shannon M. Notley*

E-mail: shannon.notley@anu.edu.au

Fig. S1 Raman spectra for exfoliated F108-graphene sample showing the peak intensity ratios between G and 2D indicating highly exfoliated graphene.
