Structural, morphological and spectroscopic characterization

**Figure S1.** SEM images of ZnO microcrystals obtained at 200°C for a) Zn/OA/OM = 1:2:8 and b) Zn/OA/OM = 1:8:2

**Figure S2.** a) ATR-FTIR spectrum and b) TGA curve of EP microcrystals after the washing treatment with EtOH, in order to purify the products from the surfactants residuals.
**Figure S3.** XPS spectrum in the C1s region for EP ZnO microcrystals

**ESR investigation**

**Figure S4.** Experimental ESR spectra of ZnO® microcrystals at 130K before (bottom) and after (top) UV-Vis irradiation at $p < 10^{-2}$ mbar.
