Supplementary Information
Supplementary Figure 1. Digital images of blood clots after contacting with (a) Gel, (b) Gel-TXA-Abs (c) Gel-TXA-Add and (d) Celox®.

Supplementary Figure 2. Activation graph dot plots of three volunteers participated in this study. The materials are separated horizontally: (A) Celox®, (B) Control (without contacting with any material), (C) Gel and (D) Gel-TXA-Abs groups. Sample represents blood of volunteer.
Supplementary Figure 3. Activation graphs of CD41, CD63, CD62P, and CD42B after contacting of blood from volunteers. The materials are separated horizontally: (A) Celox®, (B) Control (without contacting with any material), (C) Gel and (D) Gel-TXA-Abs groups.
