Figure S1. TEM image of PPG-FA (a) and PPG-FA-Ce6 (b), DLS analysis of PPG-FA (c) and PPG-FA-Ce6 (d)
**Figure S2.** The UV/vis absorbance spectra of FA at a series of concentrations and the standard curve of measured absorbance of FA at 283 nm at a series of FA concentrations.

**Figure S3.** H&E stained images of major organs collected from untreated mice and intratumorally injected with PPG-Ce6 and intravenously injected with PPG-FA-Ce6 at day 2 post treatment.
