Electronic Supplementary Information For

Structural Stability and Electronic Properties of \((\text{SiH})_2\text{O}\)-formed Siloxene Sheet: A Computational Study

Yanli Wang\(^a\), and Yi Ding\(^b\)

Contents:

Figure S1: The convergence test for the imaginary part of dielectric function versus the k-point sampling.

Figure S2: The pictures for the eigenvector of the lowest unstable mode at the \(\Gamma\) point in the ideal \((\text{SiH})_2\text{O}\) sheet. Arrows stand for the directions of atomic displacements.
Figure S3: The orientation-dependent Young modulus and Poisson ratio for the ideal (SiH)$_2$O sheet.
