Figure S1. The quantum chemical descriptors and NBO charges for (A) silybinin (B) pelargonidin (C) kaempferol (D) hesperetin and (E) catechin interacted with αA receptor.
Figure S2. The quantum chemical descriptors and NBO charges for (A) caffeic acid (B) curcumin (C) cyanidin (D) daidzein (E) epicatechin (F) eriodictyol interacted and (G) frolic acid with αG receptor.
