Gold-Loaded Nanoporous Iron Oxide Nanocubes: A Novel Dispersible Capture Agent for Tumor-Associated Autoantibodies Analysis in Serum

Sharda Yadav,^a Mostafa Kamal Masud,^{b,c} Md. Nazmul Islam,^{a,b} Vinod Gopalan,^d Alfred King-yin Lam,^d Shunsuke Tanaka,^e Nam-Trung Nguyen,^b Md. Shahriar A. Hossain,^c Cuiling Li^e, Yusuke Yamauchi,^{*c} and Muhammad J. A. Shiddiky^{*,a,b}

SUPPORTING FIGURE

Fig S1: (A-B) SEM images of (A) PB nanocubes and (B) the calcined PB nanocubes. (C-D) Wide-angle XRD patterns of (C) PB nanocubes and (D) Au-loaded nanoporous iron oxide nanocubes.

Fig. S2: High-resolution TEM image of Au-loaded nanoporous iron oxide nanocubes. The deposited Au nanoparticles are highlighted by circles.
