Figure S1. $^1$H-NMR and $^{13}$C-NMR spectrum of ginnalin A. (A), $^1$H-NMR spectrum of ginnalin A (CD$_3$OD, 600 MHz), (B), $^{13}$C-NMR spectrum of ginnalin A (CD$_3$OD, 151 MHz).
Figure S2. Analysis of cell apoptosis rate of HCT116, SW480, and SW620 cell lines treated with ginnalin A by flow cytometry. Cells were treated with various doses of ginnalin A (0, 20, 40 and 80 μM) for 72 h. Each value is the mean value ± SD (n=3).
