Confirmation of methanolysis digestion products of HS shown by the addition of known synthesised disaccharide standards. An internal standard of HS d6 digest is shown (blue dotted trace, MRM m/z 390-162) compared to the primary HS digestion products (Red solid trace, MRM m/z 384-162). For comparison purpose all signal intensities are displayed as % response normalised to the signal intensity of the digestion products of 10 µg HS (A), with the standard addition of disaccharide 1 (B), disaccharide 5 (C) and disaccharide 7 (D).
