Figure S1. Hydrodynamic size of FUP in PBS measured by DLS, after stored for different times ranged from 1 d to 8 d.

Figure S2. *In vitro* cytotoxicity of blank vehicle of F127/C$_{18}$-PEI against NIH3T3 cells, after 24 or 48 hours of incubation. Data are expressed as the mean ± standard deviation (error bars) from at least three independent experiments.
Figure S3. *In vitro* cytotoxicity of cationic blank vehicle of F127/C_{18}-PEI against HCT-116 or HCT-8 cells, after 48 hours of incubation. Data are expressed as the mean ± standard deviation (error bars) from at least three independent experiments.

Figure S4. UA content in HCT-116 and HCT-8 cells incubated with FUP or FUN for 4 hours.
