SUPPLEMENTARY MATERIAL

Plasmon-Enhanced Two-Photon Excitation Fluorescence of Rhodamine 6G and Eu-diketonate complex by Picosecond Diode Laser

Janice B. Rabor, a Koki Kawamura, a Junichi Kurawaki, a† and Yasuro Niidome*a

a Department of Chemistry and Bioscience, Graduate School of Science and Engineering, Kagoshima University, 1-21-35 Korimoto, Kagoshima 890-0065, Japan.
†Email: yniidome@sci.kagoshima-u.ac.jp
†Deceased January 5, 2019
Fig. S1 SEM images of TSNP immobilized on glass substrate with an extinction of (a) 0.1, (b) 0.4 and (c) 0.6; scale bar = 500 nm.

Fig. S2 Overlap between the extinction spectrum of TSNP and emission spectrum of Rh6G and Eu-TDPA.
