Figure S1. (a) PXRD pattern and (b) FESEM image of the as-synthesized product prior to acid etching. A zoom-in image of a single particle is shown as an inset in panel (b).

Figure S2. (a) TEM image, (b) SAED pattern and (c) HRTEM image of the as-synthesized product prior to acid etching.
Figure S3. The unit-cell crystal structure of Prussian blue.

Figure S4. Plots of (a) $1/T_1$ and (b) $1/T_2$ versus iron concentrations for the as-synthesized product after acid etching treatment with 0 M.
Figure S5. Plots of (a) $1/T_1$ and (b) $1/T_2$ versus iron concentrations for the as-synthesized product after acid etching treatment with 0.5 M.

Figure S6. Plots of (a) $1/T_1$ and (b) $1/T_2$ versus iron concentrations for the as-synthesized product after acid etching treatment with 1.5 M.
Figure S7. Plots of (a) $1/T_1$ and (b) $1/T_2$ versus iron concentrations for the as-synthesized product after acid etching treatment with 2 M.

Figure S8. Plots of (a) $1/T_1$ and (b) $1/T_2$ versus iron concentrations for the as-synthesized product after acid etching treatment with 2.5 M.
