Figure S1. Fluidic flow pattern that results when the rotating platform is tilted at a 90° angle and rotates 180° every 4 seconds.

Figure S2. Fluidic flow pattern that results when the rotating platform is tilted at a 45° angle and rotates 180° every 8 seconds.
Figure S3. Fluidic flow pattern that results when the rotating platform is tilted at a 90° angle and rotates with a frequency of 73 Hz.
